

Brand Catalog

Curated brand access for company stores, merch programs, and bulk orders.

How to read this catalog

This catalog is organized by how each brand is connected to Brand Sauce. Each brand card shows the product type and Minimum of One availability. Availability may vary by inventory, product, color, program setup, and final quote review.

Product type

Each brand is marked as Apparel or Hardgoods so clients can quickly understand what type of products the brand offers.

Minimum of One

Min. one: Yes means the brand can support single item ordering.

MOQ varies means minimums depend on the specific product and must be confirmed.

YETI

Min. one: Yes

Hardgoods

API Connected

Connection Type

API connected: Connected through our supplier systems and are generally easier to add to client stores.

Non API connected: Still available, but handled manually. Because they are not connected through API, they may require more setup, more review, and additional production time.

 LIVE INTEGRATION

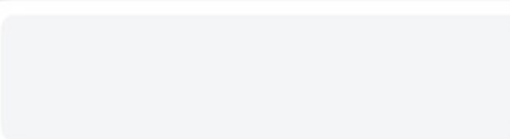

API Connected

Brands with live API integration — available for on-demand and bulk programs.
